Claims Allowed

Claims 1-15 are allowable over the prior art of record. The claims are allowed because the prior art does not anticipate nor render obvious the invention of a differential comprising a first and a second case halves joined together to form a differential case and supported by at least one bearing in a stationary housing, a ring gear with an outer circumferential portion with teeth, and an inner circumferential portion defining an opening for receiving a tubular portion of the case and wherein the inner portion is constrained between the bearing and the case to accommodate thrust loads.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Prior Art Discussed

The examiner has considered the references cited in his Information Disclosure Statement filed October 17, 2003. None of the references show all of the features of the claimed invention. Peterson '942 shows a ring gear 10 with an inner portion 16 residing on a tubular extension of the housing 2, but is not constrained by any bearing to accommodate thrust loads and the differential case itself is not divided into first and second halves. Short '871 shows a ring gear 22 with a unlabeled inner portion wherein the ring gear is abutting a thrust bearing 34a, but there is no second differential case half, as required by the claimed invention.

The examiner did not cite any further references.
